

Waleed Barghouthi

PRODUCT OPERATIONS | BUSINESS SYSTEMS | AI AUTOMATION

Ramallah, Palestine • Open to relocation • +970 594120902 • waleedsrb@gmail.com • linkedin.com/in/waleedsrb

Early-career product and systems professional with a BSc in Computer Science and hands-on experience in ETL pipelines, AI-enabled workflow design, product discovery, and cloud deployment. Brings a practical blend of data literacy, customer insight, and technical delivery - translating business needs into clear requirements, scalable workflows, and measurable decisions.

EXPERIENCE

Product Management Specialist - Consumer | Jun 2026 - Present

Jawwal | Ramallah, Palestine

- Coordinate consumer product initiatives across fintech, fixed-line, and mobile segments; track KPIs and align delivery across cross-functional stakeholders.
- Scope a predictive project-performance dashboard using historic timelines, budgets, spend, and outcome KPIs to support go/no-go decisions for new initiatives.

Founder & Product Lead | Jan 2026 - Present

M'oeen | Ramallah, Palestine

- Built a WhatsApp-native order-management product for Palestinian SMBs, addressing unstructured orders and lack of inventory visibility.
- Designed an Arabic/Levantine AI workflow combining RegEx pre-filtering, Gemini 2.5 Flash, and human approval; evaluated LLM options for cost and accuracy.
- Run an active pilot with 8 merchants, using feedback and usage patterns to improve workflow precision, response behaviour, onboarding, and the order lifecycle.

Data Engineering Intern | Feb 2026 - Jun 2026

ASAL Technologies | Rawabi, Palestine

- Built Python ETL pipelines using AWS S3 and Lambda to automate serverless data ingestion and transformation workflows.
- Deployed a web application to a self-managed Linux VPS, owning server configuration, environment setup, and the deployment pipeline.
- Instrumented key user flows with Google Analytics and applied AI-assisted review workflows to strengthen code quality and delivery speed.

Automation Engineer (Freelance) | Jun 2025 - Oct 2025

Remote - New York, USA

- Designed Telegram-WordPress automations that improved content accessibility by 30%; deployed containerised solutions with Docker.
- Built multilingual Arabic-English translation and summarisation workflows using Mistral AI.

EDUCATION & CREDENTIALS

BSc in Computer Science Eotvos Lorand University, Budapest | Sep 2022 - Jul 2025 | Database Systems & SQL, Software Engineering, Data Structures & Algorithms, Web Development

Certifications Google: Prepare Data for Exploration; Ask Questions to Make Data-Driven Decisions (2026) | Cisco: IoT Fundamentals - Big Data & Analytics (2023)

SKILLS

Data & Automation Python, SQL (PostgreSQL), ETL pipelines, data modelling, AWS S3, AWS Lambda, n8n, Docker, REST APIs, webhooks, JSON, Linux/VPS

Product & Analytics KPI tracking, product discovery, merchant/user interviews, requirements, workflow and order-lifecycle design, Google Analytics, Tableau Public, data visualisation

AI & Delivery LLM workflow design, Gemini API, Mistral AI, prompt engineering, token optimisation, React, Firebase, Git, Agile/Scrum

Languages Arabic (Native) | English (C2) | Hungarian (Conversational) | French (A2)
